BUFFERED

COCO BAGS 50% WHC

Premium Washed & Buffered Fine Pith & Chips Coco Coir Blend Substrate for Professional Growers

The Fibrgro Coco Bag 50% WHC is a premium grow pot made from a blend of coir chips and pith, engineered for professional horticulture. With a 40/60 mix of coir chips and fine pith coco, this buffered and triple-washed substrate supports both vegetative and generative crop development. It delivers consistent performance in high-frequency fertigation systems and commercial cultivation environments.

FEATURES & BENEFITS

Ready-to-Use Format

Pre-cut drain slits, dripper holes, and planting holes save time and labor

Excellent Root-Zone Environment

Ideal air-to-water ratio promotes healthy root development and fast plant establishment

Clean & Safe

Compliant with RHP standards for phytosanitary safety—free from pathogens, harmful organisms, and pesticide residues

Low EC & Ideal pH:

EC < 0.5 mS/cm and pH 5.0–7.5 for precise nutrient management

Cost-Effective

Reduces setup time and labor in cultivation environments

Sustainable Choice

Organic, compostable and biodegradable coir; recyclable outer plastic bag

Certified Quality

ISO 9001:2015 certified, GMO-free, and rigorously quality controlled

TECHNICAL SPECIFICATIONS

Content: 40% Coir Chips / 60% Coir Pith

Water Holding Capacity (WHC): 50%

Air-Filled Porosity at Saturation: 25–35%

Buffering: Triple-washed and buffered

Product Type: Open Top Bag

Usage: Suitable for floor or table propagation

Irrigation: Ideal for frequent watering, fertigation, and automated dosing systems

Available Sizes

- 1 Gallon
- 1.5 Gallon
- 2 Gallon
- 3 Gallon
- 5 Gallon

Packaging

- Shipped in stackable cardboard boxes or crates on pallets.
