

COCO COIR

SELL SHEET

PREMIUM

LOOSE COCO 50L

Loose, Washed & Buffered Coco Coir Substrate – Premium Grade for Professional Cultivation

Fibrgro Premium Loose Coco is a high-quality, loose coco coir substrate made from the husk of the coconut. With a consistent blend of pith and fine coco fibers, it offers excellent aeration, drainage, and moisture retention—perfect for demanding growers. The coir is triple washed and buffered to ensure low EC and a stable pH, making it ideal for precision nutrient management.

FEATURES & BENEFITS

Triple Washed & Buffered

Ensures consistent, high-performance results across all growing cycles

Low EC & Balanced pH

EC < 0.5 mS/cm and pH between 5.0–7.5 for precise nutrient management

Root Health Optimization

Promotes vigorous root development and stronger overall plant health

Superior Drainage & Aeration:

High porosity enhances oxygenation in the root zone

Fertigation-Ready

Ideal for frequent watering, dosing systems, and precision fertigation

Eco-Friendly Packaging

Organic, compostable, biodegradable substrate with a recyclable outer bag

Uniform Structure

Provides reliable root zone consistency for uniform crop performance.

Early Growth Advantage

Optimized for propagation, sowing, and young plant development

Broad Crop Compatibility

Suitable for vegetables, flowers, potted plants, and nursery applications

Versatile Application

Use as a complete standalone medium or blend with other substrates

Contents:

Coir pith and sun-dried coir chips (wind-screened)

***Plug-and-Grow Convenience:**
Pre-treated and ready to use—just saturate and plant

TECHNICAL SPECIFICATIONS

Contents: Coir pith and sun-dried coir chips (wind-screened)

Electrical Conductivity (EC):

< 0.5 mS/cm

pH (H₂O): 5.0 – 7.5

Water Holding Capacity (WHC): 58%

Bag Volume: 50 Liters

Certifications:

- ISO 9001:2015 – Quality Management System
- RHP – European Horticultural Standard

Packaging

- Packed in recyclable plastic bags and stacked on pallets for easy handling
